## About Me

I am a creative designer and a website developer with experience in Graphic Design, UI/UX Design, Product Design, and Website Development. I enjoy designing clean, functional, and visually appealing digital solutions that help companies communicate their messages effectively through their digital presence.

## Skills

- Website Development
- Graphic Design & Branding
- UI/UX Design
- Product Design
- Data Analysis
- Visual Communication
- Problem Solving

## Education

- **Bachelor of Science (B.Sc) – Computer Science**  
*Federal University of Technology, Akure (FUTA)* 2020 -2024  
Focused on computing fundamentals, problem-solving, and technology-driven solutions, with exposure to programming, systems analysis, data handling, and practical applications of technology in real-world projects.
- **Data Analytics**  
*TS Academy* 2023-2024  
Gained hands-on experience in data analysis, including data cleaning, data manipulation, and using analytical tools to extract insights and support data-driven decision-making.

## Experience

- **Product Design Manager**  
*Orion Labs* 2022-2024  
Led the design and development of innovative digital products, overseeing end-to-end product design from concept to launch. Managed a team of designers to create user-centered interfaces and experiences, ensuring consistency, usability, and alignment with business goals. Collaborated cross-functionally with product, engineering, and marketing teams to translate user needs into impactful design solutions that drove engagement and customer satisfaction.
- **UI/UX & Product Designer (Projects)**  
*Freelance / Personal Projects* 2023 - Present  
As a UI/UX and Product Designer, I create intuitive and visually engaging digital experiences by designing wireframes, prototypes, and interfaces in Figma. I focus on usability, layout structure, and user-centered design principles to improve engagement, consistency, and overall product experience. My work blends creativity with analytical thinking, ensuring every design decision enhances functionality and aligns with user needs.
- **Full-Stack Developer**  
*Quantum Solutions Ltd* 2023 - Present  
Worked on end-to-end web application development, building responsive and user-friendly interfaces while implementing robust server-side logic and database solutions. Collaborated with cross-functional teams to deliver scalable, high-performance applications that enhanced user experience and met business objectives.
- **Data Analyst**  
*Quantum Solutions Ltd* 2023 - Present  
Analyze and interpret complex datasets to generate actionable insights. Build reports and dashboards to support data-driven decisions and improve business performance, leveraging technical expertise from Full-Stack development experience.
